

Community AV Archiving Fair, New Orleans Registration (AMIA Attendees)

The Community Archiving Workshop (CAW) and AMIA/DLF Hack Day teams are joining forces, and in collaboration with the New Orleans Video Access Center (NOVAC), organizing the first ever Community AV Archiving Fair on Wednesday, November 29 (location TBD). Aimed at helping local individuals and organizations improve their audiovisual archiving skills, the Community AV Archiving Fair invites independent media makers, collecting institutions, and community groups in the New Orleans area to bring their challenges, their media objects, and their data for a day of collaborative problem solving and training in collaboration with the AMIA community.

The fair is organized around a number of "stations," each of which will be staffed by AMIA volunteers, and focus on a particular workflow, technique, or tool. Stations will likely include: Digitization Strategies, Inventory Strategies, Prioritizing Media for Digitization, File Management & Storage, Disaster Preparedness & Recovery, Tool/Resource Matchmaking, How to Run a Community Archiving Workshop, and more!

Conference attendees are invited to sign up to assist at a station or to propose their own stations, which may include working one-on-one with attendees, helping them gain the skills needed to meet specific challenges, or providing demonstrations to help people learn to use the tools that best fit their needs. Conference attendees are also welcome to join stations to expand their own knowledge-base. We are particularly interested in showcasing the work of past Hack Day events, and encourage Hack Day participants to come share the tools and resources that have been developed as a part of past events!

Please sign up using the form below, and we will contact you to either connect you to the station lead or to learn more about your station proposal.
